DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-18 and 35 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The limitations "greater than 0.5 phr" and "greater than 12.5wt. %" cannot be found in the specification.

Claim Rejections - 35 USC § 102

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. Claims 19-34 are rejected under 35 U.S.C. 102(e) as being anticipated by Conroy et al. 6,232,380 or Duvall et al. 2002/0086920.
5. The zinc ionomer of Duvall et al. can be a physical mixture of a zinc salt of a carboxylic acid having from 7 to 18 carbon atoms and a zinc salt of a polyethylene. Furthermore, the ionomer is a zinc carboxylate. The effectiveness of the mixture as a stabilizer is immaterial. The open language permits the presence of phenyl salicylate and the claims make no mention of clear, opaque or colored polymers. The rejections are maintained.

Claim Rejections - 35 USC § 103

8. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
